

Elementary Gifted Program

The Elementary Gifted Program has been busy this 2009.2010 school year adjusting to some changes and the introduction of new equipment to the class. The program was relocated to Memorial Elementary School, whose administration has been gracious in providing space and a well-appointed new classroom. The students have been engaged with the new equipment that the program has added this year. They were fortunate enough to receive a mini-grant from DeSoto County Education Foundation which enabled them to purchase an LCD projector and a digital camera. The program also received a document camera, commonly known as an "Elmo", compliments of the school district. The class is excited and delving into new skills and working with these new tools that will enable them to be more competitive in the future workplace.

The program is thankful to all of those who helped in providing these new tools that will give an ample amount of knowledge to our future generation.
